VOCABULARIUM PARVUM Anglo-Latinum,

In Usum Puerulorum qui prima Latinæ Linguæ Tyrocinia faciunt.

A Little VOCABULARY English and Latin,

For the Use of little Children that begin to learn the Latin Tongue.

By CHARLES HOOLE, M.A.

Corrected and Amended.

Cum intelligitur quid significetur, mutandum est de nomine. Cic. *Topica.*

LONDON:
Printed for *Jos. Hindmarsh*, at the *Golden-Ball* over-against the *Royal-Exchange*, 1696.

An Advertisement touching this Book.

THis little Vocabulary is an Extract only of such VVords as I used to Note in the larger, to be a certain VVay-marks unto Childrens memories, for the better learning of the rest; and to save my own labour, and the Childrens Book somewhat, I have caused them to be here Printed by themselves, as having their proper end; which is, to teach little ones how to call those things in Latin, which are every way obvious unto them; and whose names they know in English. And thus we may observe to be the first step towards the learning of any Language. VVhat further Use may be made of it, I leave to his discretion that will teach it: only let me tell the new beginner, that for his help in pronouncing Latin words, I have marked the syllable thus (ˆ) wherein he must lift up the sound above the rest: And to hint him a little towards his Grammar, I have caused the ending of the Genitive Case of every word to be set down, and the Letter denoting its Gender, viz. m. the Masculine, f. the Feminine, n. the Neuter, c. the Common of two, and d. g. the Doubtful Gender.

And now that I have digged deep enough (as I conceive) for the laying of a sure foundation of the Latin Tongue in a Child that can (though but indifferently read English, I will haste what I can (at by-times) to works that come nearer to perfection. VVhich that I may chearfully effect, God graciously vouchsafe his assistance, as hitherto.

A minimis ad maxima.
